

Resolution: Teaching Incentive Program SCH Eligibility
(from the Personnel Committee)

Whereas, the Teaching Incentive Program (TIP) is an important recognition of an individual's substantial commitment to excellence in teaching, in classes of all sizes and taught by all modes,

Whereas, the TIP program was originally implemented with student credit hour restrictions which have excluded faculty who have assignments with lower than the median student credit hours, yet who have a substantial commitment to excellence in teaching,

Be It Resolved that the TIP eligibility criteria will simply require a "substantial commitment to teaching," by regular full time faculty as determined by appropriate units, and will no longer restrict eligibility based on student credit hour production.
